Firm Profile

Intertech Associates is a Professional Engineering firm offering feasibility planning; engineering, design, and CAD drawings for voice, data, and video networks; threat assessments and security design; and public safety dispatch/radio engineering.

Intertech Associates Experience

As we celebrate our 34th year, we continue to provide quality service while achieving considerable savings for our clients through value engineering.

Government/Public Safety Experience. We engineer radio systems, dispatch centers, and video surveillance for various public safety agencies. We understand the need for interoperability when serving the public. We have worked with New York City; Orange, Westchester, and Genesee Counties, NY; Morris, Bergen, and Greater Essex Counties, NJ; and clients from Maine to Michigan on improving public safety networks.

Higher Education. Ocean County College selected us to provide IT and security system commissioning for its new Fine Arts Center and Academic Center, as well as technology design for the Novins Planetarium. We designed technology and security systems for Middlesex County College and Bergen County College.

K-12 Education. We have been selected for over 160 technology, telecom, and security assessment and design projects. These have ranged from K-12 public, private, and charter schools across New Jersey, Philadelphia, and New York City.

Security. We performed security and threat assessments and designs for police, court houses, correctional facilities, municipal buildings, housing, and educational facilities, including the NJ Hughes Justice Complex in Trenton, the Port Authority of NY/NJ Operations Control Center, Cumberland County Courthouse, Belleville Municipal Center, and School Districts including Lakewood, Long Branch, and West New York.

Residential Housing: We worked with the Trenton, Elizabeth, Lakewood, Bayonne, Clementon, and Paterson Housing Authorities on CCTV surveillance, digital recording systems, access control, visitor identification, and medical alert systems for residents.

Museums and Other Experience. We designed the IT infrastructure for the 300,000 SF renovations to the NJ Liberty Science Center and have begun work on the NJ State Museum in Trenton. Other projects include libraries, houses of worship, and commercial facilities.

Qualifications and Credentials

We are pre-qualified by the NJ DPMC, NJEDA, the NYCSCA, and Philadelphia Schools (PSIT) for services in security and telecommunications. We are a NJ SBE and a WBE in NJ, NY, PA, and FL. We have Professional Engineering licenses in NJ and DE; Certified Engineer licensed by iNARTE; and NJ Professional Planners. We are members of APCO, the Association for Public Safety Communications Officers; ASIS; and IAPSC, International Association of Professional Security Consultants. Our Chief Engineer is a member of the NJ State Board of Professional Engineers.

Our Principals

Arlene Metz Schwartz, Chief Executive Officer/President

Perry Schwartz, Chief Technology Officer/Chief Engineer, Ph.D., P.E., NCE, P.P.
