Intertech Associates Profile

Intertech Associates is a full service Professional Engineering firm specializing in all aspects of Public Safety consulting – communications, technology, and security design. Our services include design of radio; Dispatch Center/PSAP consolidation, upgrade, and relocation; CAD/RMS; E9-1-1, Wireless 9-1-1, and Reverse 9-1-1; telephone and technology infrastructure; data and network security; long- and short-haul microwave; physical security systems; and building standards and controls for Dispatch facilities.

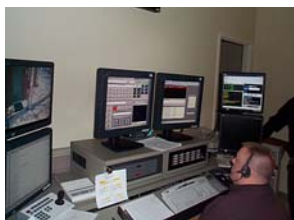

NJ State Justice Center

Belleville Municipal Center

Genesee County Sheriff

Hanover Police Dispatch

Orange County Communications

Intertech Associates Experience

As we celebrate 34 years of consulting and communications design, we continue to offer quality service while achieving considerable savings for our clients through value engineering. Our professional team of independent engineers enables our clients to take advantage of standards-based designs – not vendor driven, proprietary solutions.

Radio Engineering/Public Safety Communications. Our designs include fully integrated communications and infrastructure for Public Safety facilities, including Dispatch Centers for East Orange, Long Branch, Hanover, Genesee County and Orange County, NY. We understand the need for radio interoperability and shared record management across jurisdictions. We have developed master plans for Consolidated Dispatch for shared fire communications in Greater Essex County, and technology and radio assessment projects for Rochester Hills, MI, Lehigh County, PA, and Bangor, ME.

Government/Municipal. We have designed infrastructure and technology for court houses and other government buildings. We designed security for the Justice Complex in Trenton and the Cumberland County Courthouse. Projects have included security and technology for Police Headquarters, Sallyport areas, cell blocks, and several Correctional Facilities, including Chester County, PA. Municipal building technology and security projects have included Belleville, Chatham, and Lyndhurst.

Other Projects. We have been asked to design security, access control, and telephone for Housing Authorities in Bayonne, Lakewood, Elizabeth, Paterson, Trenton, and New York. We designed security for the Operation Control Center at the NY/NJ Port Authority Bus Terminal and designed IT infrastructure for the Liberty Science Center renovations.

Qualifications and Credentials

We have been pre-qualified by the NJ DPMC, NJEDA, and other Agencies (NJ, PA, NY) in telecommunications and security systems. We are registered as an SBE, as well as a certified WBE in NJ, PA, FL (NY pending). Our credentials include Professional Engineering licenses by the State of New Jersey; Certified Engineers licensed by the National Licensing Agent for the FCC, NARTE; and Professional Planners (NJ). We are members of APCO; the NJ State Board of Professional Engineers; and IAPSC, the International Association of Professional Security Consultants.
